

# MOISTURE RESISTANT MDF

\*all drawings are for reference only, and are not exactly to scale.

Muskoka Lumber's high grade Moisture Resistant MDF has properties that far exceed industry standards and make it ideal for precision machining. Its resistance to moisture makes this product suitable for indoor/outdoor living spaces, or above-ground exterior applications. Our full selection of profiles are 3/4" thick, and come machine-primed, UV cured, and buffed.

## FAQ: WHERE SHOULD I USE MOISTURE RESISTANT MDF INSTEAD OF REGULAR MDF (MEDIUM DENSITY FIBER BOARD)?

Moisture resistant MDF (medium density fiber board) can be used in any living spaces that experience non-climate controlled moisture (humidity) fluctuations, such as: bathroom environments, utility rooms, laundry rooms, indoor or outdoor kitchens, garages, boathouses, screened-in porches, Muskoka Rooms (and more).
